<p align="center">Release Summary Document</p>

List of User Stories(with Acceptance Criteria and List of Known Bugs for each):
  A. As a user I want to create a tenant account so that I can use Housify
      a. Acceptance Criteria:
         i. View tenant landing page
         ii. Able to access all parts of the application relevant to tenants:
            1. Housing Group
            2. Tours
         iii. No issues with register
      b. List of Known Bugs/Problems: NA
  B. As a user I want to create a landlord account so that I can use Housify
      a. Acceptance Criteria:
         i. View landlord landing page
         ii. Able to access all parts of application relevant to landlords:
            1. My Properties
            2. Tours
            3. Housing Group
      b. List of Known Bugs/Problems: NA
  C. As a landlord I want to be able to add a property listing so that tenants can visually see the property listings
      a. Acceptance Criteria:
         i. House is added to MongoDB house collections
         ii. House eventually appears in the landlord's property listings
         iii. House eventually appears in the My Properties section
      b. List of Known Bugs/Problems: NA
  D. As a tenant I want to be able to see all the property listings so that I can schedule tours for properties
      a. Acceptance Criteria:
         i. All houses show up
         ii. Property images are available
         iii. Short description of the property is available
      b. Known Bugs/Problems: NA

E. As a tenant I want to be able to schedule a tour so that I can see the property that I am interested in
   a. Acceptance Criteria:
      i. Upcoming Tours show up with no issues
      ii. Able to View Landlord's basic contact information
   b. Known Bugs/Problems: NA
F. As a landlord I want to be able to request a tenant to a housing group so that I can message them directly
   a. Acceptance Criteria:
      i. Tenant must be to join the housing group
      ii. Landlord can see the Tenant information
   b. Known Bugs/Problems: If the user has been inactive on the page for a certain amount of time, the cookies get cleared, which causes the user object to become null and breaks the room functionality as well as other parts of the website
G. As a tenant I want to be able to accept a housing group request so that I can message and pay other users
   a. Acceptance Criteria:
      i. Tenant must be able to join the housing group
      ii. Request must show up in the tenant side
   b. Known Bugs/Problems: NA
H. As a user I want to be able to communicate with other users through direct messaging so that I can make full use of the housing group feature
   a. Acceptance Criteria:
      i. Whenever a tenant messages another tenant, that message needs to be saved and the other tenant should be able to view that message once they log into their account
      ii. Message history is always preserved, for any tenant
   b. Known Bugs/Problems: If the user has been inactive on the page for a certain amount of time, the cookies get cleared, which causes the user object to become null and breaks the room functionality as well as other parts of the website
I. As a user I want to be able to communicate with other users through group messaging so that I can make full use of the housing group feature
   a. Acceptance Criteria:
      i. Message history is always preserved for all users involved in the group chat
      ii. The group chat name should be the property address for ease of use
      iii. All users automatically are able to access group chat whenever they join a housing group(for a landlord, since they make the housing group, they must join the gc as well)

b. Known Bugs/Problems: If the user has been inactive on the page for a certain amount of time, the cookies get cleared, which causes the user object to become null and breaks the room functionality as well as other parts of the website

J. As a tenant I want to be able to pay other tenants in the same housing group so that I can make full use of the housing group feature
- a. Acceptance Criteria:
  - i. Users must be able to see other user's venmo urls
- b. Known Bugs/Problems: NA

Product Backlog(with Acceptance Criteria and List of Known Bugs/Issues and Fixes for each User Story):

1) As a landlord I want to be able to request a tenant to a housing group so that I can message them directly
   - a) Acceptance Criteria:
     - i) Tenant must be to join the housing group
     - ii) Landlord can see the Tenant information
   - b) Known Bugs/Problems: If the user has been inactive on the page for a certain amount of time, the cookies get cleared, which causes the user object to become null and breaks the room functionality as well as other parts of the website
   - c) Fixes: Perhaps increase the timeout time needed for users to be deemed "inactive"
     - i) Or remove timeouts entirely and only clear cookies once user signs out

2) As a user I want to be able to communicate with other users through direct messaging so that I can make full use of the housing group feature
   - a) Acceptance Criteria:
     - i) Whenever a tenant messages another tenant, that message needs to be saved and the other tenant should be able to view that message once they log into their account
     - ii) Message history is always preserved, for any tenant
   - b) Known Bugs/Problems: If the user has been inactive on the page for a certain amount of time, the cookies get cleared, which causes the user object to become null and breaks the room functionality as well as other parts of the website
   - c) Fixes: Perhaps increase the timeout time needed for users to be deemed "inactive"
     - i) Or remove timeouts entirely and only clear cookies once user signs out

3) As a user I want to be able to communicate with other users through group messaging so that I can make full use of the housing group feature
   - a) Acceptance Criteria:
     - i) Message history is always preserved for all users involved in the group chat
     - ii) The group chat name should be the property address for ease of use

       iii)   All users automatically are able to access group chat whenever they join a housing group(for a landlord, since they make the housing group, they must join the gc as well)

b) Known Bugs/Problems: If the user has been inactive on the page for a certain amount of time, the cookies get cleared, which causes the user object to become null and breaks the room functionality as well as other parts of the website

c) Fixes: Perhaps increase the timeout time needed for users to be deemed "inactive"
       i)   Or remove timeouts entirely and only clear cookies once user signs out
